HEAR CALLS THROUGH YOUR CAR STEREO

You can listen to calls through your car stereo speakers by transferring the audio from the speakerphone to one of five FM channel options.

If your phone is A2DP-enabled you can also hear streaming audio like GPS instructions and music through your car speakers.

We recommend that you transfer audio to an FM channel before you start driving, and that you make a routinely clear channel a preset on your stereo.

1. READY

Ensure that your phone and speakerphone are powered on and connected.

Suggested placement

2. SET

Press the FM button to enter FM transmit mode. The FM transmit channel will be announced.

3. CONNECT

Manually set your radio to the announced FM channel. You are now ready to transmit calls and streaming audio like GPS directions from your phone to your car stereo.

If a radio station suddenly takes over the FM channel, tap the FM button to quickly redirect the audio back through the speakerphone.

To find another FM channel, while FM is turned on, press and hold the FM button until another channel option is announced, then tune your radio to the new channel.

TIPS

Keep Your Eyes on the Road:
The controls are easy to find with your fingertips without looking for them.

Before driving, reach up and familiarize yourself with the controls so you can keep your eyes on the road when a call comes in.

The notched Volume wheel is easy to find.

The Multi-function button is inside the wheel.

The Mute button has a raised notch.

FRONT COVER

TAKE A GOOD LOOK

MULTI-FUNCTION BUTTON

- Power on or off (3- to 4-second press)
- Take a call or end it (1 tap)
- Redial (2 taps)
- Transfer audio to or from phone during call (3-second press)
- Reject a call (press and hold until you hear tone)
- Initiate phone's voice-dialing (2-second press until second tone is heard)
- Activate manual pairing (with power off, press and hold until LED flashes red/blue)

FM BUTTON

- FM transmit on or off (1 tap)
- Find FM channel (press and hold until station option is announced)

Microphones

LED

- Charging (solid red)
- Powering on or off (2 blue flashes)
- FM transmission (2 purple flashes)
- Missed call (1 purple flash)
- Pairing mode (red/blue flashes)

VOLUME WHEEL

- Increase volume (rotate clockwise)
- Decrease volume (rotate counterclockwise)

MUTE BUTTON

- Mute on or off (1-second tap)
- Night mode: LED on or off (2-second press until tone is heard)

MICRO USB CHARGING PORT

- With micro USB or car charger: 2.5 hours (100% charge)
- Best performance when fully charged

CONNECT TO YOUR PHONE

"Pairing" is the process that connects the speakerphone to your phone. You can pair more phones but can have only one active connection at a time.

1. READY

Activate the Bluetooth feature on your phone, then use the phone's settings to add/search/discover new Bluetooth devices.

iPhone®: Settings > General > Bluetooth > On (starts the search for devices)

BlackBerry® smartphone: Settings/options > Bluetooth: On > Search for devices

VIDEO TUTORIAL FOR USA:
www.plantronics.com/pairing

TIPS

Listen to the Voice:
You will hear various voice status alerts when you power on/off, search for FM channels or when battery level is low.

Learn to Share:
When powering on, the speakerphone searches for the last connected phone. If the last connected phone is not within range, or the Bluetooth feature is turned off on the phone, then another phone within range that has been previously paired with the speakerphone can be connected by tapping the Multi-function button.
