

Body Worn Multi-Function Receiver

Model BWR100

The MyAlert™ Digital Radio Frequency (DR-F) wireless remote receiver connects to all MyAlert transmitters to capture and alert signals for telephone, smart phone, door, window and a range of sounds. The BWR100 is a cost effective, safe and secure solution to alert you to those important sounds you may be missing. The unit provides months of use on inexpensive batteries, with class leading range so working in the back yard will no longer be a problem. The BWR100 uses our unique million-code technology, which means no more false flashing from a neighbors system. Complete with 24/7 safe system

supervision, this reliable portable receiver will always notify you if any part of the system isn't working. With its attractive, clean design this loud and clear portable alert receiver is the ideal choice for the most convenient communications system available!
