

**LIBERTO** 

## Revolutionary desk and directional microphone with Bluetooth

Liberto is the world's first and smallest combined Bluetooth microphone which is introduced with sensational range and lip synchronization for people hard of hearing. Liberto has integrated two different microphones, which makes it very convenient in all daily situations where amplified sound is required. By choosing the omni-directional microphone, it can be placed on a table e.g. at meetings, in a restaurant or at home etc. In noisy surroundings, Liberto can easily be converted into a directional microphone where you actively point it towards the person you are talking with. Simple and ingenious!

  
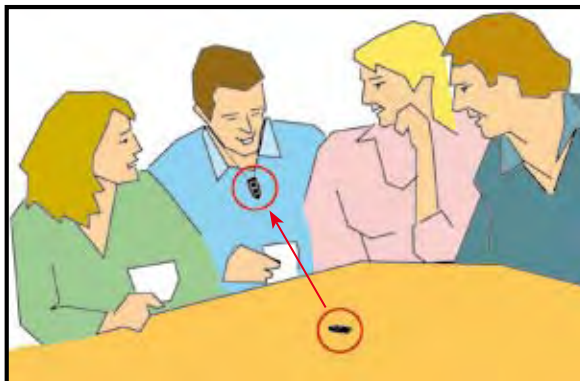

Bluetooth®

Scale  
1:1

The sound experience and speech recognition is optimal due to the digital processing of sound and 12 dB reduction of background noise.

- Complete microphone for challenging situations
- First class lip-synchronized sound with the use of digital sound processing and transfer
- Liberto is included in the set CIBS TOTAL, CIBS MEETING and CIBS PERSONAL LISTENER, which are the ultimate solutions for meetings and conversations available on the market today!
- Can also be programmed so that it also works as a push-to-talk microphone. Applies to CIBS TOTAL, CIBS MEETING and CIBS PERSONAL LISTENER.
- Ideal for use at lectures, in the class room, in the car or at home
- The ideal wireless microphone for your Maestro Communicator

International charger and clip with string are included
