

Director Product Specification – v1.1

The Director is a powerful lightweight microphone that plugs into standard loop amplifiers to enhance the sound level and quality received by wearers of Telecoil-equipped hearing instruments within the loop's range. The Director can also be used in conjunction with voice recorders for recording lectures and discussion groups for subsequent review and analysis.

The Director amplifies the available sound level and filters out background noise for enhanced listening, providing noticeable improved hearing quality even in noisy in environments.

A small **microphone** unit that can be held in your hand or placed on a suitable surface. This amplifies the sound through the loop or recording system.

Physical Data

Dimensions: L x W x H: 102 x 50 x 35mm, Weight 82g

Environmental

Case Material	Moulded ABS
Drop test	1m, any axis
Operating temperature	-10C to +60C
Humidity	95% non-condensing

Electronic

Acoustic Sensitivity	-47dBV/Pa @1KHz
Distortion (THD)@1KHz	1%
Background Noise Reduction	Typically 18dB

System

Audio bandwidth	100Hz to 6KHz
Cable Length	1.5m
Plug type	3.5mm Jack, mono or stereo option

Standards Compliance

EC Directive 1999/5/EC
