listenor Pro

Listener Pro is a powerful lightweight microphone which provides greatly enhanced sound level and quality for people with a hearing difficulty. Designed for easy use with binaural headphones, earphones or an inductive loop for use with hearing aids.

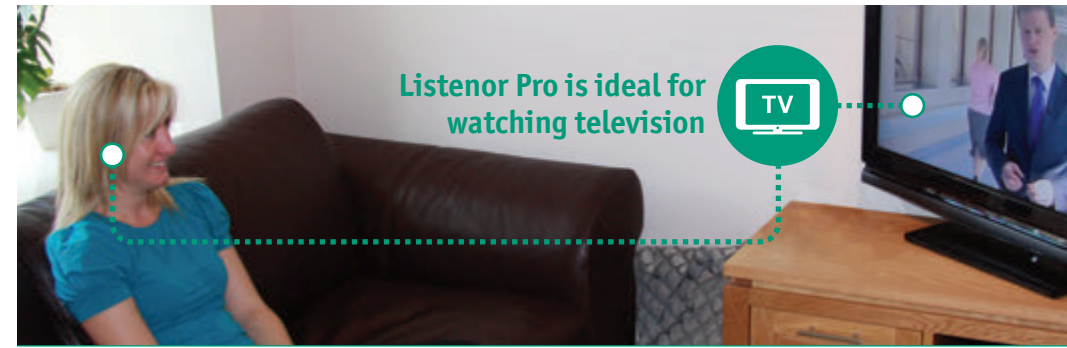

The standard version is supplied with earphones, neck lanyard and two AAA batteries so that it is ready to use. Listener Pro amplifies the available sound level for enhanced listening, providing noticeably improved hearing pleasure, even in noisy environments.

Listener Pro is ideal for watching television and conversing with others in the room. Volume and tone controls enable you to get the best out of your listening experience.

Listener Pro can be placed in a raised position on a nearby surface using the belt clip, or held in the hand and pointed towards the source of sound.

There are a number of optional accessories which can help those everyday listening requirements.

Headphones can be substituted for earphones, and an inductive loop is available as an optional extra for users who have telecoil-equipped hearing instruments.

The Telephone Kit provides cables to connect to a landline telephone. The Listener Pro amplifies the caller's voice and you can continue to converse using the handset.

Audio cables are available for connection to the headset socket on Radio, computer, MP3 or iPod, or CD players.

TV cables are available for connection to a TV. There is also an extension cable available where required.

To use the Listener Pro in meetings, class rooms, lecture theatres and other group sessions a Conversor directional microphone is available which focusses on the sounds you want to hear and accordingly increases the range at which you can hear the speaker's voice.

A list of the all the available accessories is included below:

- **Headphones** (CON01HDP)
- **Inductive Loop** (SUB01IND)
- **Telephone Kit** (PROV1LTK)
- **Audio Cable** (PROV1LAU)
- **TV Cable** (PROV1LTV)
- **MM1 Directional Microphone** (CON01MM1)
- **Director Pro directional microphone** (PROV1DIR)
