ANY MORE!**

**INCOMING VOLUME
40 dB**

The Equalizer

The Equalizer (EQ40) offers the latest in telecommunication technology to give you louder, clearer, and more understandable conversations. The EQ40 amplifier increases the incoming voice by 40+ decibels. By adjusting the graphic equalizer to meet your comfort level, you will enjoy the conversation time after time with one push button to activate the amplification: When hung up, the graphic equalizer will automatically turn off to protect the hearing members in the family. There is also a window cover to protect the equalizer from unwanted changes. Its advanced electronic circuit design eliminates unwanted background noise to make every word clearer and easier to understand, all without any feedback or distortion. It has a super loud ringer with selectable ring tones. You'll never miss another call again!!! It features extra large buttons with high contrast graphics for optimum visibility and dialing ease. No more adapter needed.
