

# VOICE<sup>TM</sup> TESTER

Model HD-1000

A simple way to  
demonstrate and compare  
different corded and  
cordless telephones

- Designed specifically to demonstrate and compare the performance of different corded and cordless telephones
- Set up is simple, just plug in the telephones you wanted to evaluate. No telephone line or live connection necessary
- When you pick up the connected phones, the VoiceTester automatically plays a pre-recorded voice message, in both a male's and a female's voice, to simulate someone talking on the phone
- The VoiceTester plays the pre-recorded message on a continuous loop so that you can evaluate the phones at your own pace
- You can connect up to two phones for simultaneous comparison
- It even generates off-hook phone line signals to demonstrate the Off-Hook Warning feature of the Serene HD-60 and HD-60J amplified telephones
