

DOOR/WINDOW ACCESS TRANSMITTER

Never be surprised by someone entering through a door (or window) unexpectedly. This unit is comprised of two small magnetic contact bars and a transmitter. When the door or window is opened, the two bars lose magnetic contact, triggering the transmitter. The transmitter then sends a signal to the receiver, and depending on which receiver you are using, you will be alerted by a vibration or a strobe light.

Easy to install. Operates on 2- AAA batteries. Range of up to 100 feet.

Door/Window Access Transmitter \$ 69.25
(Shipping and handling extra)
(Add 6% sales tax in MI)
