Trouble Shooting

- Q1: Base Charging Indicator is not on when handset is placed on the base.
Ans: Move the handset slightly to improve contact.
- Q2: No CID information on an incoming call.
Ans: Check your subscription with your phone company.
- Q3: No Dial tone.
Ans: Verify battery is OK; make sure the handset is not power-off.
- Q4: No display on handset.
Ans: Verify battery is OK; make sure the handset is not power-off.
- Q5: Handset does not ring.
Ans: Verify battery is OK; verify handset is not powered off; verify "Do-Not-Disturb" is not active.
- Q6: Why is the red flasher always blinking?
Ans: This indicates you have voice mail waiting in your provider's voice mail server. Or, you have missed a call; reviewing incoming call list clears this indicator.
- Q7: Static noise on the line.
Ans: Your phone may be located near a touch lamp, microwave, or other appliance,

4. Enter default PIN "0000" and press to confirm.
5. Wait for a confirmation tone and then press to exit.

Swapping Handset Batteries with Base Batteries:

Handset and base batteries are inter-changeable. In the event that handset batteries are running low, it is acceptable to swap the handset batteries with two from the base. This eliminates the handset re-charge time.
Note: A fully charged handset battery can provide 8 hrs of talk time (80 hrs standby). Base batteries can provide ~4 hrs of backup. After a temporary power outage, it may take 1 to 2 minutes for the handset to self re-register with base.

Menu Flow Chart

Navigate The Main Menu & Sub-Menu:

1. While off-line, press to enter main menu; Screen shows "CALL LOG".
2. Press or to scroll thru all menu options.
3. Press to select a menu option to change.
