

HA360BU – SONICBRIDGE™ / LAMP SWITCH

The HomeAware™ SonicBridge™ module HA360BU allows traditional Sonic Alert receivers to work with the new HomeAware™ D-RF Secure™ system. The HomeAware™ is the only wireless system available that is compatible with all Sonic Alert remote receivers including the SA101, SA201, BL300, RH100 and SB1000 alarm clock. It also has the added feature of allowing a lamp to be plugged into it to allow for a flashing lamp option. To install the SonicBridge™ follow the four steps below.

1. Simply plug the SonicBridge™ into any 120v outlet (do not plug into extension cords, power strips or surge protectors) must be plugged directly into the outlet for the best receiver reception.
2. Plug the opposite end into the back of the HomeAware™ Main unit where it says Lamp SW.
3. You are now connected to the home power line which will allow the HomeAware™ to communicate with your traditional Sonic Alert remote receivers.
4. If you would like to utilize the option of a flashing lamp for your alerts simply plug any lamp into the SonicBridge™ and turn the lamp switch to the on position. Your lamp can now be turned on and off through the HomeAware™ Main unit by pressing the snooze button for on and off.

Important notes for lamp bulb type

Lamp light bulb must not exceed 300 watts. Also make sure the lamp is in the on position and that the bulb is a good bulb.

Bulb types to use in lamps are as follows;
Incandescent, LED, and instant on CFL type bulbs must be used.

FCC Requirements

This device complies with part 15 of the FCC rules, and with RSS-210 of Industry Canada. Operation is subject to the following two conditions; (1) This device might not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide responsible protect against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions manual, may cause harmful interference to radio communications. However, there is no guarantee that interference will not interfere in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment on and off, the user is encouraged to try to correct the interference by one or more of the following measures:

- i. Reorient or relocate the receiving antenna.
- ii. Increase the separation between the equipment and receiver.
- iii. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- iv. Consult the dealer or and experienced radio/ TV technician for help

Modification not expressly approved by the manufacturer could void the user's authority to operate the equipment under FCC rules
