SEC100 USB Portable Flashing E-mail Alert

Thank you for purchasing the SEC100 Portable Flashing E-mail Alert from Sonic Alert. We appreciate your purchase and want to assure you that we will do everything possible to make your purchase a great experience.

Our SEC100 is an evolving product. As new Internet and E-mail communication alternatives become available we will be working hard to help alert you to these new methods. By developing the SEC100 to be easily updated via our driver download section, your SEC100 will never go out of date. Please check our web site periodically for new drivers that will work with the SEC100.

Before you use your SEC100 you will need to download the necessary drivers for your applications. Please go to www.sonicalert.com/sec100 to view installation directions and to upload necessary drivers for current applications. Also please check back from time to time for any new applications that may have been added after your last download.

Troubleshooting:

- * Make sure the SEC100 is plugged into a working USB port and that your computer is turned on.
- * If you connect the SEC100 to a different USB port, you may be asked to install the driver again. This is normal.

For Customer Service or help in uploading drivers and directions please call 1-888-864-2446. Or e-mail at support@sonicalert.info
